

EDRIAN MARIÑAS

SOFTWARE DEVELOPER

edrian.a.marinhas@gmail.com | +63 985 470 3444 | Metro Manila, PH

[linkedin.com/in/edrian-a-marinhas](https://www.linkedin.com/in/edrian-a-marinhas) | github.com/edrian-a-marinhas | Portfolio: edrian-marinhas.vercel.app

Technical Skills

Back-end: Python, FastAPI, Django, REST APIs, Pydantic, SQLAlchemy, Alembic, Pytest, asyncio, AI Integration

Front-end: TypeScript, React.js, React Query, JavaScript, Zod, Vite, TailwindCSS

Database: PostgreSQL, MySQL, SQL, Supabase, DB Modeling, Schemas

Tools: Git, GitHub Actions (CI/CD pipelines), Docker, Postman, CLI/Linux, VS Code, Groq API

Concepts: Auth(JWT), Role-Based Control, Data Validation, In-Memory and Client-Side Caching, Testing, Automation

Experience

Full Stack Developer Intern (500 hours)

CertiCode (SupSoft Tech) | March 2026 – June 2026

- Built and maintained RESTful APIs with core backend business logic and services.
- Designed database models and schemas with migrations to ensure shared database consistency
- Enforced data integrity across database, backend, and frontend to prevent invalid inputs.
- Team collaboration using GitHub, Jira, and GitHub Actions to manage development and CI/CD workflows.

Projects

TransacScope — Role-Based Business Finance Management | Full-Stack Developer | Apr 2026

transacscope.vercel.app

- Developed 39 secured REST API endpoints across 11 database tables, managing 1,000+ transactions.
- Integrated an AI financial assistant with role-aware scoping, keyword filtering, and session-scoped context caching.
- Implemented in-memory caching (TTL + invalidation), connection pooling, rate limiting, and React Query.
- Wrote 119 Pytest tests covering CRUD, role enforcement, data validations and deletions. Automated via CI/CD.

Ask Edrian — AI-powered personal chatbot | Full-Stack Developer | Jan 2026

edrian-ai-profile-assistant.vercel.app

- Built a personal AI chatbot, powered by Groq AI — that answers questions about me.
- Implemented backend AI processing with API endpoints and a responsive frontend for interactive chat.

BirdCare — Environment Monitoring App with IoT | Software Developer | Nov 2025

birdcares.online

- Developed BirdCare: mobile app for real-time monitoring and alerting of bird care conditions.
- Built threshold alerts and graph visualizations for real-time and historical data.
- Developed threshold-based alerts to notify users when environmental readings exceed safe ranges.

Education

Our Lady of Fatima University – B.S. Information Technology (2022 – 2026)

Arellano University – STEM Strand (2020 – 2022)

Trainings & Seminar Attended

Seminar and Convention: Digital Fabric: AI Imperatives and Risk, and Multimedia Augmentation.

IT Specialist – Python | Certiport, Pearson (2026)

Python Essentials 1 & 2 Certificate – NetAcad (2024)
